

Bold Thinking

This fall, four jurors from around the country met to judge this year's Architectural Portfolio. When determining citation winners and other outstanding designs, this year's jury decided upon the following criteria:

- Facilities should embrace **environmental stewardship** through both mechanical and cultural means.
- Indoor and outdoor **social spaces that engage** students in learning are critical to successful design.
- **Comfortable and flexible** learning spaces foster student ownership of the school environment.
- **Innovative programming** that brings together partners to form community allows vital resources to be directed to students and families.
- A design process **bringing together multiple stakeholders** can lead to powerful architecture that can positively impact learning outcomes.
- Holistic design solutions aim to **promote health, a sense of wellbeing and connection to the outdoors.** 🌿

ART FRAZIER

KIMBERLY A. KEENER

KARINA RUIZ

DINA SORENSEN

“Stunning urban solution. Interconnected spaces, transparency and balance between open and intimate places.”

WILLIAM W. CAUDILL CITATION, P. 14-15

“We were looking for buildings that addressed campus context, aesthetics, collaboration, technology, connections to outdoors, daylight and sustainability – this one does it all.”

LOUIS I. KAHN CITATION, P. 16-17

“A transformative program and site strategy for collaborative partnerships.”

SPECIAL CITATION, P. 18-19

“This compact, well-imagined response had flexible elements for student engagement with great indoor/outdoor transitions.”

ELEMENTARY SCHOOL CITATION, P. 24-25

“Elegant solution and expression of high-performance building through details, daylighting and natural materials.”

POST-SECONDARY CITATION, P. 82
