

The 2016 Educational Interiors Showcase jury (left to right): Dude, Rose and Hoskens.

Dr. David Dude

Superintendent • City Schools of Decatur (Ga.)

David Dude became the superintendent of City Schools of Decatur (CSD) in November 2015 after serving more than 19 years in numerous capacities as an educator and educational leader.

Before that, he worked as Chief Operating Officer of the 13,500-student Iowa City (Iowa) Community School District, where he was responsible for nearly all aspects of operational efficiency and effectiveness in the district. After designing and carrying out a districtwide technology initiative, he led the district's Facilities Master Planning process, leading to the adoption of a 10-year plan that included three new 500-student elementary schools and a new 1,500-student comprehensive high school.

Prior to his tenure in Iowa City, David served as chief technology officer for Kansas City (Mo.) Public Schools and provided technological leadership and development within Iowa's state testing program at the University of Iowa. His career as an educational leader is rooted in his 11 years of teaching high school math.

David graduated cum laude from Cornell College with a B.A. in Mathematics and Secondary Education. He received an M.A. in Educational Administration and an M.A. in Educational Measurement & Statistics, both from the University of Iowa, after which he earned a Ph.D. in Educational Policy & Leadership Studies, also from the University of Iowa.

Judy Hoskens

Director, Education Studio, and Principal • Cuningham Group Architecture, Inc.

With more than 25 years of experience in architecture, Judith Hoskens is a nationally recognized thought leader in education and the head of the Education Studio at Cuningham Group, an international design firm with a diverse portfolio and more than 320 employees in 10 offices. Judy's professional passion is promoting and bringing to reality the positive connections between physical learning environments and student success. Her strengths lie in her ability to listen and translate clients' goals and needs into solutions that uniquely reflect their cultures and to help large groups determine facility needs and priorities.

Judy is often called upon to help define the learning environments of the future, including her recent work with the Department of Defense's educational division and work on Personalized Learning with the Bill and Melinda Gates Foundation together with the American Architectural Foundation. Judy also served as an adjunct professor at the School of Architecture, University of Minnesota, offering a studio titled, "Creating a Culture of Innovation: The Link Between Environment and Learning." Judy is a member of the Association for Learning Environments (A4LE, formerly CEFPI) and is its former international president. In 2013, she received the A4LE Lifetime Achievement Award for her contributions to the organization and the field of educational facility planning.

Jessica Rose

**Communications Officer,
Facilities Management •
Georgia Institute of Technology**

Jessica supports communications and engagement within the Facilities Management Department at the Georgia Institute of Technology. In this role she develops sustainability strategies, which engage teams to minimize their impact on the natural environment, while contributing to the triple bottom line.

Before working at Georgia Tech, she was a sustainability consultant in the built environment for six years and also spent time managing programs in the event and mobile marketing industry. She has a deep appreciation for thoughtful spaces that foster a sense of connection and purpose for the occupants. 🧑‍🏫

The 2016 EIS jury pores over projects during the judging process.
